Full Stack Developer

PROJECTS

- **SkyScanner** falcons-scanner.herokuapp.com/
A website developed using MERN stack, that fetches flights data from Skyscanner API based on search query, a logged in user can add tickets to his cart and checkout using Stripe API, the user is authenticated using JWT and bcrypt for password hashing in DB.
- **OnlineSchoolSystem**
Full-Stack Application using Django and sqlite3 for backend, React typeScript with Redux for frontend, Firebase Cloud Firestore for live chat between users.
- **Personal Expenses App**
A mobile app developed using Flutter & Dart, for both Android and iOS, the app lets you add all the purchases or payments you have done, to give you a nice representation of your last week expenses using an interactive chart.
- **Face Detection**
A website developed using React where you can create an account protected by bcrypt password-hashing authentication function in a PostgreSQL database using Node.js and Express. Once logged in, Clarifai face detection API will detect any face in a given image and a box will be drawn around the face.

EDUCATION

- 2020-2021 ● **ReBootKamp - Anera PLUS RBK**
The ReBootKamp program is a career accelerator, producing high quality software engineers in 16 weeks using a curriculum developed in Silicon Valley. One of the Arab world's first coding boot camps. Providing market-ready, adaptable coding skills and other essential "soft" skills demanded by the industry. Technical skills include Javascript, MongoDB, Express, React, NodeJS, & HTML/CSS. Non-technical skills include essential communication, collaboration, problem solving and critical thinking.
- 2012-2016 ● **BSc Civil Engineering - An-Najah National University**
GPA 3.21/4
